MAY IS ELECTRICAL SAFETY MONTH!

Each year, preventable accidents and injuries occur due to electrical hazards. May, designated as Electrical Safety Month, serves as a reminder to prioritize safety when dealing with electricity.

Check cords, outlets, and appliances for wear and tear. Replace damaged items promptly.

Avoid overloading outlets and use surge protectors.

Keep electrical appliances away from water sources and never touch outlets with wet hands.

Install tamper-resistant outlets and keep cords out of reach.

Save energy and reduce fire risk by unplugging devices when not in use.

Learn how to safely reset circuit breakers, GCFI outlets, and replace fuses. When in doubt, consult an electrician.

For complex electrical work, hire a licensed electrician.

Prioritizing electrical safety is vital for protecting ourselves and our communities.

CONSERVATION TIPS

Energy Conservation Tip:

Using the air-dry setting on your dishwasher instead of the heated-dry cycle can save up to 15% of the energy used on each washing cycle.

Water Conservation Tip:

Dirty car? Go to the car wash! Washing your vehicle at home can use 100+ gallons of water versus the 40 gallons or less that is used by a commercial car wash.
